

What worked well?	What didn't go well?	What can be improved?
Communication between pairs		Documentation how to deploy the web application to guide future developers
Working on modules per functionality		More polishing on the UI/UX Integration of the web app
Compilation of all functionalities in one web interface		Division of the Epic/User stories into more smaller User stories
Redirection of Krona visual	Embedding the Krona website to the bat guano web app due to the CORS policy	develop a way to connect the output of the Krona Tools
Creation of stacked bar charts to demonstrate phylum distributions	Creation of database collection from stacked bar charts	More dynamic passing of data
